DETAILED ACTION

Claims 1, 2 and 4-30 are pending in the application. Claims 12-30 are withdrawn from consideration for being directed to non-elected subject matter. Claims 1, 2 and 4-11 are currently under examination.

This Office Action is in response to the Amendment filed on 8/27/02.

Response to Amendment

The objection to the drawing has been withdrawn in light of Applicants' amendment.

The objection to the specification has been withdrawn in light of Applicants' amendment.

The submission of corrected CRF and paper copy of the sequence listing is acknowledged. The application is now in sequence compliance.

The rejection of claims 1-11 under 35 U.S.C. 101/112 1st paragraph (enablement) has been withdrawn in light of Applicants' amendment of the claims.

The rejection of claims 2-11 under 35 U.S.C. 112 1st paragraph (written description) has been withdrawn in light of Applicants' amendment of the claims.

The rejection of claims 2, 5-11 under 35 U.S.C. 112 2nd paragraph has been withdrawn in light of Applicants' amendment of the claims.

Claim 4 is rejected under 35 U.S.C. 102 (a) for reasons discussed below.

Claims 5-11 are rejected under 35 U.S.C. 103 (a) for reasons discussed below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1636

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 4 is rejected under 35 U.S.C. 102(a) as being anticipated by A74554 (10/15/1999) or A77533 (10/19/1999).

Claim 4 is drawn to an isolated nucleic acid sequence that hybridizes to SEQ ID NO: 1.

A74554 or A77533 shares 250 base pair homology with SEQ ID NO: 1. A74554 or A77533 can hybridize to the nucleic acid sequence of SEQ ID NO: 1. Therefore, A74554 or A77533 discloses the instantly disclosed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over A74554 or A77533.

It would have been obvious to one of ordinary skill in the art to make a vector comprising the nucleic acid A74554 or A77533, a host cell comprising said vector, wherein the host cell can be a mammalian cell such as melanocyte or immortalized cell. The ordinary skill in the art would have been motivated to do so to express the polypeptide encoded by A74553 or A77533. At the time of invention, the level of skill in the molecular cloning is high. Inserting a nucleic acid sequence into a vector and introducing the vector into a host cell is routine experimentation. Absent evidence to the contrary, one of ordinary skill in the art would have reasonable expectation of success to make a vector comprising A74554 or A77553 and a host cell

Art Unit: 1636

comprising said vector. Therefore, the invention would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made.

Claims 1 and 2 are allowed.
